Registration Forms using Frames

HTML practical: two registration forms shown side by side using frameset (columns and rows).

Files in this practical

1. `frame example 1 cols.html` - Frameset splitting the screen into two columns
2. `frame example2 row.html` - Frameset splitting the screen into two rows
3. `student.html` - School registration form (loaded in the first frame)
4. `employee registratipon form.html` - Employee registration form (loaded in the second frame)

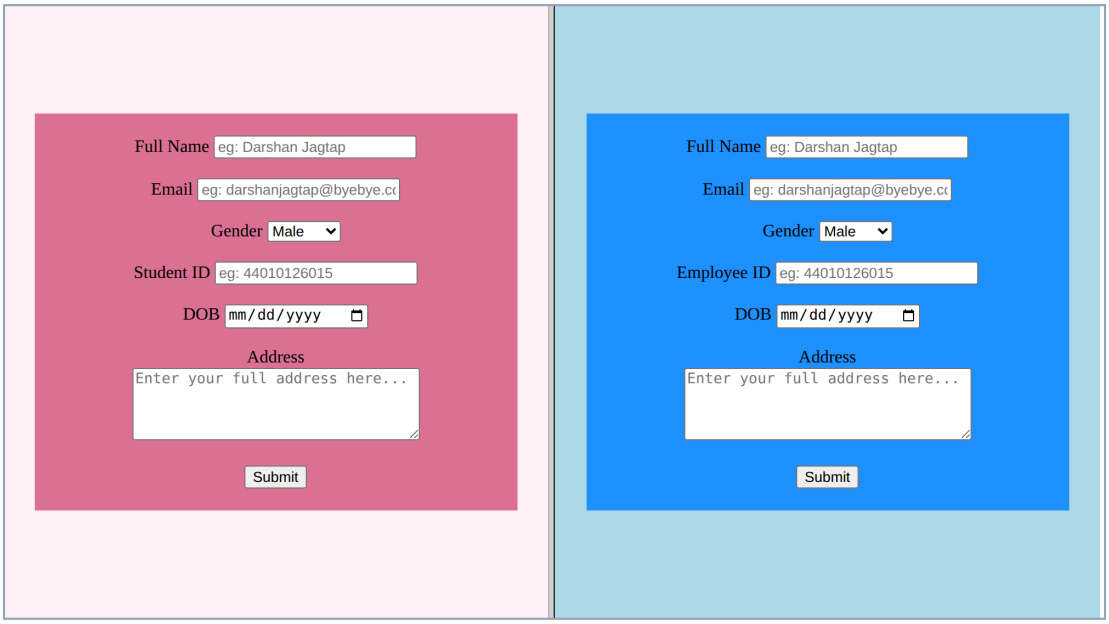

1. frame example 1 cols.html

Frameset splitting the screen into two columns

Code

```
<!DOCTYPE html>
<html>
<head>
    <title>Registration Portal</title>
</head>
<!-- Splits the screen into two equal columns -->
<frameset cols="50%, 50%">
    <frame src="student.html">
    <frame src="employee registratipon form.html">
</frameset>
</html>
```

Output

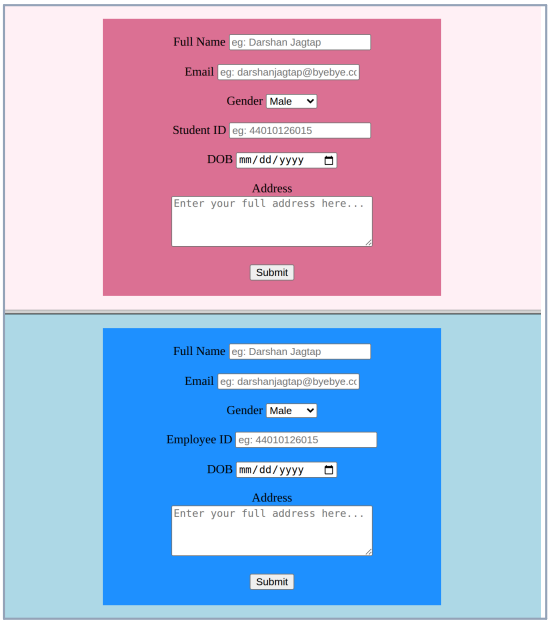

2. frame example2 row.html

Frameset splitting the screen into two rows

Code

```
<!DOCTYPE html>
<html>
<head>
    <title>Registration Portal</title>
</head>
<!-- Splits the screen into two equal columns -->
<frameset rows="50%, 50%">
    <frame src="student.html">
    <frame src="employee registratipon form.html">
</frameset>
</html>
```

Output

3. student.html

School registration form (loaded in the first frame)

Code

```
<!DOCTYPE html>
<html>
<head>
<title>School Registration Form</title>
</head>
<!-- Flexbox inline style forces perfect vertical and horizontal centering -->
<body style="background-color: lavenderblush; display: flex; justify-content: center; align-items: cente
    r; min-height: 100vh; margin: 0; text-align: center;">

<div style="background-color: palevioletred; width: 400px; padding: 20px;">
    <form>
    <label>Full Name</label>
    <input type="text" name="fname" placeholder="eg: Darshan Jagtap"><br><br>

    <label>Email</label>
    <input type="text" name="email" placeholder="eg: darshanjagtap@byebye.comics"><br><br>

    <label>Gender</label>
    <select name="gender">
        <option value="male">Male</option>
        <option value="female">Female</option>
    </select><br><br>

    <label>Student ID</label>
    <input type="number" name="rollno." placeholder="eg: 44010126015"><br><br>

    <label>DOB</label>
    <input type="date" name="dob" placeholder="eg: 24/07/2008"><br><br>

    <label>Address</label><br>
    <textarea name="address" rows="4" cols="30" placeholder="Enter your full address here..."></textarea
        ><br><br>

    <input type="submit">
    </form>
</div>

</body>
</html>
```

Output

4. employee registratipon form.html

Employee registration form (loaded in the second frame)

Code

```
<!DOCTYPE html>
<html>
<head>
<title>Employee Registration Form</title>
</head>
<body style="background-color: lightblue; display: flex; justify-content: center; align-items: center; m
    in-height: 100vh; margin: 0; text-align: center;">

<!-- Changed background-color to 'dodgerblue' for better text visibility -->
<div style="background-color: dodgerblue; width: 400px; padding: 20px;">
    <form>
    <label>Full Name</label>
    <input type="text" name="fname" placeholder="eg: Darshan Jagtap"><br><br>

    <label>Email</label>
    <input type="text" name="email" placeholder="eg: darshanjagtap@byebye.comics"><br><br>

    <label>Gender</label>
    <select name="gender">
        <option value="male">Male</option>
        <option value="female">Female</option>
    </select><br><br>

    <label>Employee ID</label>
    <input type="number" name="empno." placeholder="eg: 44010126015"><br><br>

    <label>DOB</label>
    <input type="date" name="dob" placeholder="eg: 24/07/2008"><br><br>

    <label>Address</label><br>
    <textarea name="address" rows="4" cols="30" placeholder="Enter your full address here..."></textarea
        ><br><br>

<input type="submit">
    </form>
</div>

</body>
</html>
```

Output
